

#### PUR790- Cherry Park Tree Project- Addendum 1

- Only single-stem trees will be accepted.
- The contractor is responsible for weed control in the islands around the newly planted trees.
- The contractor is expected to conduct bi-weekly inspections of the stakes around the trees.
- The tree diagram shows that there are 3 Bradford Pears at the back of the parking lot near the berm that should be replaced with elms. There are actually 5 Bradford Pears in that area, however, and all should be removed and replaced with elms.
- Substitutions may be accepted for the Dynamite crepe myrtles as long as the blooms are red and the tree will tree form, i.e. ability to be limbed up to 10 feet.
